Alliance for Integrity is proud to offer this
important training workshop for professionals,
corporations and organizations designed to
fortify your brand and reputation.

Relevant As Never Before

In today's lightning-fast, hyper-connected, transparent world, problems of integrity crop up all the time. They emerge from all corners, raising choices of critical import. Whether beneficial or damaging, all choices are on the record and can affect your reputation and competitive edge.

The Program

- Review of performance with integrity – its true meaning, indispensable importance, governing tenets, benefits and pay-offs.
- Utilizes audience participation in assessing “real world” incidents to determine whether integrity was exercised or abandoned. Examples of case studies to be analyzed include:
 - Relationships with third party contractors, vendors, competitive bidders, government agencies
 - Delivery of products and services – as promised, when promised, in the manner promised
 - Conflicts of interest
 - Staff and employee accountability
 - Omitted information in reports, studies, advertising
- Addresses the difference between wise and poor integrity choices – and their consequences.
